

Incident Report

Incident Date: December 17, 2024

Incident Time: 8:22 AM (GMT+9)

The following threat has been identified on a Deep/Dark web forum.

The Incident

C***o Partial Breach

Hello BreachForums Community

Today, I have shares the C***o partial Breach for you to download. Thanks for reading and enjoy!

In October 2024, C***o accidentally left open their DevHub instance, which allowed @zjj, IntelBroker and EnergyWeaponUser to download the entire 4.5TB contents of their system.

This download only contains the following:

C***o C9800 SW-iosxe-wlc.16.11.01

C***o IOS XE & XR

C***o ISE

C***o SASE

C***o Umbrella

C***o Webex

Total file size is 2.9GB

Hopefully this proves the legitimacy of the breach to others wanting to buy the full version.

Tree file!

Download!
